

R 150 MS2

TECHNICAL SPECIFICATIONS

NOT FOLDABLE

- Class of calculation H1B4
- Lifting moment = 110634 lbfft
- Hydraulic outreach = 27,55 ft
- First arm rigid style
- Jib with two hydraulic extensions with integrated fluid transmission system inside jib
- Proportional flow control
- Top seat laterally mounted controls with two additional functions at the jib extension
- Stabilizers with hydraulic rotation 180°, extension and descent
- Stabilizers ground bilateral controls
- Ground hoisting control
- Crane rotation 425° with double rack
- Construction to Machinery Directives 2006/42/CE+UNI EN 12.999
- Basic crane weight*: 6349 lb

** The weight is indicative and referred to the basic crane without options or accessories, protection carters and ancillary equipments (grab, clamp, glass handling device)*

OPTIONS

- Stabilizers with pantograph descent
- Proportional electro-hydraulic flow control with SCANRECO radio control
- Lateral top seat control with joystick and pedals
- Man standing platform with crane operative restricted area
- Glass container handling device
- Oil cooling system
- Top seat access ladder
- Working lights (top seat and jib light)
- Hour counter
- Dry seat foldable shelter
